Facility Condition Analysis

NEVADA HIGHWAY PATROL SUBSTATION
Henderson, NV

BUILDING NUMBER:  1945

FACILITY CONDITION ANALYSIS
The Facility Condition Analysis Program was created under the authority found in NRS 341.201. The State Public Works Board develops this report using cost estimates based on contractor pricing which includes materials, labor, location factors and profit and overhead. The costs of project design, management, special testing and inspections, inflation and permitting fees are not included. Cost estimates are derived from the R.S. Means Cost Estimating Guide and from comparable construction costs of projects completed by SPWB project managers.

The deficiencies outlined in this report were noted from a visual survey. This report does not address routine maintenance needs. Recommended projects do not include telecommunications, furniture, window treatments, space change, program issues, or costs that could not be identified or determined from the survey and available building information. If there are buildings without projects listed, this indicates that only routine maintenance needs were found. This report considers probable facility needs for a 10 year planning cycle.

This report is not a guarantee of funding and should not be used for budgeting purposes. This report is a planning level document for agencies and State Public Works Board to assess the needs of the Building and/or Site and to help support future requests for ADA upgrades / renovations, Capital Improvement Projects and maintenance. The final scope and estimate of any budget request should be developed by a qualified individual. Actual project costs will vary from those proposed in this report when the final scope and budget are developed.

Establishing a Facility Condition Needs Index (FCNI) for each building

The FCA reports identify maintenance items and establish construction cost estimates. These costs are summarized at the end of the report and noted as construction costs per square foot. A FCNI is commonly used by facility managers to make a judgment whether to recommend whole replacement of facilities, rather than expending resources on major repairs and improvements. The FCNI is a ratio between the proposed facility upgrade costs and facility replacement costs (FRC). Those buildings with indices greater than .60 or 60% are recommended to be considered for complete replacement.

Class Definitions

**PRIORITY CLASS 1 - Currently Critical (Immediate to Two Years)**

Projects in this category require immediate action to return a facility to normal operation, stop accelerated deterioration, correct a fire/life safety hazard, or correct an ADA requirement.

**PRIORITY CLASS 2 - Necessary - Not Yet Critical (Two to Four Years)**

Projects in this category include conditions requiring appropriate attention to preclude predictable deterioration or potential downtime and the associated damage or higher costs if deferred further.

**PRIORITY CLASS 3 - (Four to Ten Years)**

Projects in this category include items that represent a sensible improvement to existing conditions. These items are not required for the most basic function of a facility; however, Priority 3 projects will either improve overall usability and/or reduce long-term maintenance.

This building was donated to the state in 1984, and has served as an NHP substation, Internal Affairs station and most recently as the southern offices for the State Fire Marshal. The building is vacant.

There is no separate site report.

These costs were developed from the RS Means ADA Compliance Pricing Guide.

*ACCESSIBLE WATER FOUNTAIN*
This building contains a water fountain, which does not meet current codes. UBC Section 1105.4.1 requires that where a water fountain is provided, at least half, but not less than one, be accessible. This project will provide an accessible, dual-height drinking fountain on the main lobby.

These costs were developed from the RS Means ADA Compliance Pricing Guide.

*ADA ACCESSIBLE COUNTER*
This building contains a counter which does not meet current codes. UBC Section 1105.4.4.2 requires that where a service counter is provided, a portion of the counter be accessible. This project will provide an accessible counter space at the main lobby location.

These costs were developed from the RS Means ADA Compliance Pricing Guide.

*ADA PARKING*
There is no accessible parking. CABO/ANSI A117.1 - 1992 Section 4.6.2 states, "...accessible parking spaces shall be identified by a sign showing the international symbol of accessibility..." The lot will be re-striped, accessible routes of travel identified, and signage is included.

These costs were developed from the RS Means ADA Compliance Pricing Guide.

*ADA RAMP*
An existing ramp was installed at the front of the building; is not the proper size or configuration for ADA access and there are no handrails or guardrails.

This project provides a new landing and installing handrails and guardrails in accordance with ADA requirements.

*REPLACE ROOF*
The roof on this building was reported in poor condition at the time of the survey, with evidence of recent leaks.

This project recommends the building be re-roofed as soon as possible, to minimize further deterioration and damage to the building.
PRIORITY CLASS 2 PROJECTS

Total Construction Cost for Priority 2 Projects: $21,000

Necessary - Not Yet Critical  Two to Four Years

INTERIOR FINISHES

Based on building use and the passage of time, the interior walls should receive an application of paint or sealer for proper upkeep and maintenance.

Project Index #: 1945INT1
Construction Cost $3,000

LIGHTING UPGRADE

The building lighting fixtures are older fluorescent units and not energy efficient.

This project will upgrade lighting fixtures to T-8 lamps with electronic ballasts, resulting in increased efficiency and reduced costs. Occupancy sensors will be installed in restrooms and other areas for additional savings.

Project Index #: 1945ENR1
Construction Cost $3,000

MINOR ELECTRICAL UPGRADE

This building was constructed before the high demand for new types of electrical devices were needed. This project will provide additional outlets and some expansion capability for future needs.

Project Index #: 1945ELE1
Construction Cost $5,000

REPLACE FLOORING

The flooring is reaching the end of its useful life.

It is recommended that carpet in the building be replaced.

Project Index #: 1945INT2
Construction Cost $5,000

RESEAL ASPHALT PARKING AND ROADS

The site paving is in fair condition. It is recommended the parking area and driveway be fog sealed and re-stripped to extend the life of the asphalt.

Total Construction Cost $5,000

PRIORITY CLASS 3 PROJECTS

Total Construction Cost for Priority 3 Projects: $24,000

Long-Term Needs  Four to Ten Years

LONG-TERM NEEDS

Projects in this category address possible long term needs of the facility. This does not represent a cost for all maintenance but is a budgetary estimate for future maintenance and Capital Improvement Projects (CIPs).

The cyclical treatment of the building exterior and interior is important to help maintain the finish, weather proofing, integrity and appearance of the building.

This project does not include the roofing system, but includes items related to water proofing the building envelope, including painting or staining, sealing, repair, and caulking at windows, flashing, fixtures, and sills.

This includes interior applied finishes such as paint, grout, and caulking. Special attention should be paid to areas that are exposed to moisture.

This project includes possible system replacements.
BUILDING INFORMATION:

Facility Replacement Cost per Square Foot: $100

NOTES:

The deficiencies outlined in this report were noted from a visual survey. The costs do not represent the cost of a complete facility renovation or maintenance needs. Recommended projects do not include telecommunications, furniture, window treatment, space change, program issues, relocation, swing space, or costs that could not be identified or determined from the survey and available building information.

Individual projects and costs noted herein may be impacted by new construction materials or methods, agency projects, and pending or proposed Capital Improvement Projects (CIP).

This report was created under the authority found in NRS 341.201 by the State Public Works Board and should be utilized as a planning level document.
