FALLON NATIONAL GUARD ARMORY
895 East Richards Street
Fallon, Nevada 89406

Site Number: 9885
STATE OF NEVADA PUBLIC WORKS DIVISION
FACILITY CONDITION ANALYSIS

Report Printed in April 2012
The Facility Condition Analysis Program was created under the authority found in NRS 341.201. The State Public Works Division develops this report using cost estimates based on contractor pricing which includes materials, labor, location factors and profit and overhead. The costs of project design, management, special testing and inspections, inflation and permitting fees are not included. Cost estimates are derived from the R.S. Means Cost Estimating Guide and from comparable construction costs of projects completed by SPWD project managers.

The deficiencies outlined in this report were noted from a visual survey. This report does not address routine maintenance needs. Recommended projects do not include telecommunications, furniture, window treatments, space change, program issues, or costs that could not be identified or determined from the survey and available building information. If there are buildings without projects listed, this indicates that only routine maintenance needs were found. This report considers probable facility needs for a 10 year planning cycle.

This report is not a guarantee of funding and should not be used for budgeting purposes. This report is a planning level document for agencies and State Public Works Division to assess the needs of the Building and/or Site and to help support future requests for ADA upgrades / renovations, Capital Improvement Projects and maintenance. The final scope and estimate of any budget request should be developed by a qualified individual. Actual project costs will vary from those proposed in this report when the final scope and budget are developed.

Establishing a Facility Condition Needs Index (FCNI) for each building

The FCA reports identify maintenance items and establish construction cost estimates. These costs are summarized at the end of the report and noted as construction costs per square foot. A FCNI is commonly used by facility managers to make a judgment whether to recommend whole replacement of facilities, rather than expending resources on major repairs and improvements. The FCNI is a ratio between the proposed facility upgrade costs and facility replacement costs (FRC). Those buildings with indices greater than .50 or 50% are recommended to be considered for complete replacement.

Class Definitions

PRIORITY CLASS 1 - Currently Critical (Immediate to Two Years)

Projects in this category require immediate action to return a facility to normal operation, stop accelerated deterioration, correct a fire/life safety hazard, or correct an ADA requirement.

PRIORITY CLASS 2 - Necessary - Not Yet Critical (Two to Four Years)

Projects in this category include conditions requiring appropriate attention to preclude predictable deterioration or potential downtime and the associated damage or higher costs if deferred further.

PRIORITY CLASS 3 - (Four to Ten Years)

Projects in this category include items that represent a sensible improvement to existing conditions. These items are not required for the most basic function of a facility; however, Priority 3 projects will either improve overall usability and/or reduce long-term maintenance.

FALLON ARMORY SITE
BUILDING REPORT

The Fallon National Guard Armory is located on a little more than 3 fully fenced acres with two structures, a metal storage building and the main armory. There is paved parking area for staff and the public including ADA accessible parking and new paving in the fenced yard in the rear of the facility. The site has electrical and natural gas service, city water and sewer service and is well maintained.

PRIORITY CLASS 2 PROJECTS

<table>
<thead>
<tr>

<td>Project Index #: 9885SIT1</td>
</tr>
<tr>
<td></td>
<td>Construction Cost $33,750</td>
</tr>
</tbody>
</table>

It is important to maintain the asphalt concrete paving on the site. This project would provide for minor crack filling and slurry sealing of the paving site wide including access roads, parking areas and the maintenance yard. Striping is included in this estimate. This project should be scheduled on a 5 year cyclical basis to maintain the integrity of the paving and prevent premature failure. 45,000 square feet of asphalt area was used to generate this estimate.

STORAGE BUILDING

The Storage Building is an engineered metal structure on a concrete foundation. It has an overhead coiling door and a man door and is used primarily for storage. The building is in excellent condition.

PRIORITY CLASS 3 PROJECTS

Total Construction Cost for Priority 3 Projects: $960

Long-Term Needs Four to Ten Years

Project Index #: 3087EXT1

Construction Cost $960

EXTERIOR FINISHES

It is important to maintain the finish, weather resistance and appearance of the building. This project would provide funding to protect the exterior of the building excluding the roof. Included in the cost is the caulking and sealing of the flashing, fixtures and all other penetrations. It is recommended that the building be caulked and sealed in the next 5-7 years and that this project be scheduled on a cyclical basis to maintain the integrity of the structure.

BUILDING INFORMATION:

Gross Area (square feet): 960

Year Constructed: 0

Exterior Finish 1: 100% Metal Siding

Exterior Finish 2: 0%

Number of Levels (Floors): 1 Basement? No

IBC Occupancy Type 1: 100% S-2

IBC Occupancy Type 2: 0%

Construction Type: Engineered Metal Building

IBC Construction Type: III-B

Percent Fire Suppressed: 0%

PROJECT CONSTRUCTION COST TOTALS SUMMARY:

Priority Class 1: $0 Project Construction Cost per Square Foot: $1.00

Priority Class 2: $0 Total Facility Replacement Construction Cost: $48,000

Priority Class 3: $960 Facility Replacement Cost per Square Foot: $50

Grand Total: $960 FCNI: 2%
FALLON ARMORY
BUILDING REPORT

The Fallon Nevada National Guard Armory Building is a concrete masonry unit constructed structure with a flat single-ply roofing system. The building contains support offices, training and conference rooms, ADA accessible restrooms, a kitchen and a large gymnasium area for physical activities. The building has a newer fire alarm and sprinkler system and recently underwent a renovation including the kitchen, restrooms and fixtures, new windows and a new roofing system.

---

State of Nevada / Military
FALLON ARMORY
SPWD Facility Condition Analysis - 0678
Survey Date: 1/19/2012

03-Apr-12
JANITORS CLOSET REPAIRS

The mop sink in the Janitors Closet is mounted adjacent to gypsum board and is showing signs of water damage. This project would provide fiberglass reinforced panels (FRP) to be installed on the walls adjacent to the mop sink. The FRP shall extend two feet beyond the edge of the sink and a minimum of 54” above the floor finish.

Project Index #: 0678INT3
Construction Cost $1,400

WATER HEATER REPLACEMENT

There are two large gas-fired water heaters in the building. One unit was installed in 1993 and the other in 1999. The average life span of a water heater is eight to ten years. With the passage of time and lack of water treatment, these units are showing signs of wear and should be scheduled for replacement in the next 3-4 years. Due to the inconsistent usage of the facility, it is recommended to replace these units with an on demand water heating system to reduce energy costs. Removal and disposal of the existing equipment is included in this estimate.

Project Index #: 0678PLM2
Construction Cost $6,000

WATER TREATMENT SYSTEM REPLACEMENT

The existing water softening/treatment systems in the building are currently not operational. They have not been maintained and have reached the end of their lifecycles. Failure of the equipment causes wear and tear on the domestic water supply lines, plumbing fixtures and HVAC equipment. This project would provide for the replacement of the existing water softeners/treatment systems with new equipment. This project would also provide for a chemical treatment program including an updated chemicals control system, service and employee training provided by a qualified water treatment vendor. The annual maintenance fee charged by the water treatment vendor would be determined after an investigation of the water system is complete. These annual costs are not included in this project cost. For budgeting purposes, a $12,000 fee is suggested. This project should be implemented concurrently with the CULINARY FIXTURES REPLACEMENT project.

Project Index #: 0678PLM1
Construction Cost $20,000

PRIORITY CLASS 3 PROJECTS

Total Construction Cost for Priority 3 Projects: $104,040
Long-Term Needs Four to Ten Years

EXTERIOR FINISHES

It is important to maintain the finish, weather resistance and appearance of the building. This project would provide funding to protect the exterior of the building excluding the roof. Included in the cost is painting the concrete masonry unit walls and caulking of the windows, flashing, fixtures and all other penetrations. It is recommended that the building be painted and caulked in the next 5-7 years and that this project be scheduled on a cyclical basis to maintain the integrity of the structure.

Project Index #: 0678EXT1
Construction Cost $52,020

INTERIOR FINISHES

The interior finishes are in good condition. It is recommended that the interior walls and ceilings be painted at least once in the next 4-5 years and that this project be scheduled on a cyclical basis to maintain the integrity of the structure. Prior to painting, all surfaces should be repaired and prepped. An epoxy-based paint should be utilized in wet areas for durability.

Project Index #: 0678INT4
Construction Cost $52,020
BUILDING INFORMATION:

Gross Area (square feet):   10,404
Year Constructed:           1962
Exterior Finish 1:          75 % Painted CMU
Exterior Finish 2:          25 % Glazing Panels
Number of Levels (Floors): 1    Basement?  No
IBC Occupancy Type 1:      60 % A-3
IBC Occupancy Type 2:      40 % B
Construction Type:          Concrete Masonry Units & Wood
IBC Construction Type:     V-A
Percent Fire Suppressed:   100 %

NOTES:

The deficiencies outlined in this report were noted from a visual survey. The costs do not represent the cost of a complete facility renovation or maintenance needs. Recommended projects do not include telecommunications, furniture, window treatment, space change, program issues, relocation, swing space, or costs that could not be identified or determined from the survey and available building information.

Individual projects and costs noted herein may be impacted by new construction materials or methods, agency projects, and pending or proposed Capital Improvement Projects (CIP).

This report was created under the authority found in NRS 341.201 by the State Public Works Division and should be utilized as a planning level document.
