CARLIN CONSERVATION CAMP

101 Susie Creek Road
Carlin, Nevada 89822

Site Number: 9973
STATE OF NEVADA PUBLIC WORKS DIVISION
FACILITY CONDITION ANALYSIS
The Facility Condition Analysis Program was created under the authority found in NRS 341.128. The State Public Works Division develops this report using cost estimates based on contractor pricing which includes materials, labor, location factors and profit and overhead. The costs of project design, management, special testing and inspections, inflation and permitting fees are not included. Cost estimates are derived from the R.S. Means Cost Estimating Guide and from comparable construction costs of projects completed by SPWD project managers.

The deficiencies outlined in this report were noted from a visual survey. This report does not address routine maintenance needs. Recommended projects do not include telecommunications, furniture, window treatments, space change, program issues, or costs that could not be identified or determined from the survey and available building information. If there are buildings without projects listed, this indicates that only routine maintenance needs were found. This report considers probable facility needs for a 10 year planning cycle.

This report is not a guarantee of funding and should not be used for budgeting purposes. This report is a planning level document for agencies and State Public Works Division to assess the needs of the Building and/or Site and to help support future requests for ADA upgrades / renovations, Capital Improvement Projects and maintenance. The final scope and estimate of any budget request should be developed by a qualified individual. Actual project costs will vary from those proposed in this report when the final scope and budget are developed.

Establishing a Facility Condition Needs Index (FCNI) for each building

The FCA reports identify maintenance items and establish construction cost estimates. These costs are summarized at the end of the report and noted as construction costs per square foot. A FCNI is commonly used by facility managers to make a judgment whether to recommend whole replacement of facilities, rather than expending resources on major repairs and improvements. The FCNI is a ratio between the proposed facility upgrade costs and facility replacement costs (FRC). Those buildings with indices greater than .50 or 50% are recommended to be considered for complete replacement.

Class Definitions

PRIORITY CLASS 1 - Currently Critical (Immediate to Two Years)

Projects in this category require immediate action to return a facility to normal operation, stop accelerated deterioration, correct a fire/life safety hazard, or correct an ADA requirement.

PRIORITY CLASS 2 - Necessary - Not Yet Critical (Two to Four Years)

Projects in this category include conditions requiring appropriate attention to preclude predictable deterioration or potential downtime and the associated damage or higher costs if deferred further.

PRIORITY CLASS 3 - (Four to Ten Years)

Projects in this category include items that represent a sensible improvement to existing conditions. These items are not required for the most basic function of a facility; however, Priority 3 projects will either improve overall usability and/or reduce long-term maintenance.

CARLIN CONSERVATION CAMP  
BUILDING REPORT

The Carlin Conservation Camp opened in July of 1988. The camp is located about 1-1/4 miles east of Carlin and is built in a dormitory setting surrounded by security fencing. The site contains numerous buildings scattered around the facility and also includes the Nevada Division of Forestry's facilities. There is a large parking area which has ADA accessible parking for the public. It also has an on site sewer grinder and holding ponds for sewer treatment. The site also has natural gas service and a well and above ground water tank for domestic water and fire protection storage.

PRIORITY CLASS 1 PROJECTS

Currently Critical Immediate to Two Years

PORTABLE FIRE EXTINGUISHERS

Several of the buildings do not have fire extinguishers. Portable fire extinguishers shall be provided for employee use and selected and distributed based on the classes of anticipated workplace fires and on the size and degree of hazard which would affect their use. On Class A fires, the placement of extinguishers shall be located so that the travel distance for employees to any extinguisher is 75 feet or less and on Class B fires, placement of extinguishers shall be located so that the travel distance for employees to any extinguisher is 50 feet or less. Reference OSHA 1910.157(d). This project would provide funding for the purchase of 10 fire extinguishers, cabinets, and the hardware necessary to install them. This project or a portion there of was previously recommended in the FCA report dated 09/19/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 09/17/2013.

Total Construction Cost for Priority 1 Projects: $5,000

Project Index #: 9973SFT1  
Construction Cost $5,000

BUILDING SIGNAGE

The site contains several different buildings with no signage to identify the contents or use. Some of the buildings contain paint, propane tanks and other possible flammable items. In case of an emergency the buildings should be labeled. This project would provide funding for signage to be installed on all the buildings. This project or a portion there of was previously recommended in the FCA report dated 09/19/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 09/17/2013.

Total Construction Cost for Priority 2 Projects: $134,000

Project Index #: 9973SIT2  
Construction Cost $1,000

CRACK FILL AND SEAL ASPHALT PAVING

The existing paved area around the site is in fair condition. This project recommends filling in the minor cracks, applying a slurry seal and re-stripping the parking area and entrance road in the next two to three years. This project or a portion there of was previously recommended in the FCA report dated 09/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 09/17/2013.

Total Construction Cost for Priority 2 Projects: $25,000

Project Index #: 9973SIT4  
Construction Cost $25,000

INSTALL POLE LIGHTING AROUND PARKING LOT

The entrance road and parking area have insufficient lighting. Considering the environment of the site, this area needs to be well lighted. This project would provide funding for purchase and installation of 12 additional 30 foot tall light poles including 30" diameter raised concrete bases, electrical trenching, conduit, wiring and connections to existing utilities. LED Light fixtures should be considered for energy savings. The poles should match the existing light poles surrounding the site. This project or a portion there of was previously recommended in the FCA report dated 09/19/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 09/17/2013.

Total Construction Cost for Priority 2 Projects: $108,000

Project Index #: 9973SEC1  
Construction Cost $108,000
PROJECT CONSTRUCTION COST TOTALS SUMMARY:

Priority Class 1: $5,000
Priority Class 2: $134,000
Priority Class 3: $0

Grand Total: $139,000
The water tank is located along the north portion of the Carlin Conservation Camp site. It is an above ground 130,000 gallon capacity steel storage tank in good condition.

**PRIORITY CLASS 3 PROJECTS**

Total Construction Cost for Priority 3 Projects: $50,000

Long-Term Needs

Four to Ten Years

**EXTERIOR FINISHES**

It is important to maintain the finish, weather resistance and appearance of the water tank on a cyclical basis. This project recommends work to protect the exterior tank envelope including sand blasting, painting, staining, or other applied finishes to maintain the tank in good, weather tight condition.

**BUILDING INFORMATION:**

Gross Area (square feet):

- Year Constructed: 1988
- Exterior Finish 1: 100 % Steel
- Exterior Finish 2: 0 %
- Number of Levels (Floors): 0
- Basement? No

**IBC Occupancy Type 1:**

- 0 %

**IBC Occupancy Type 2:**

- 0 %

**Construction Type:** Above Ground Steel Water Tank

**IBC Construction Type:**

**Percent Fire Suppressed:** 0 %

NDF SHOP
BUILDING REPORT

The NDF Shop is an engineered steel structure with metal siding and roofing on a concrete slab-on-grade. The interior has a painted finish on three sides. It is located on the east side of the Multi-Purpose building and is used by staff and inmates for servicing equipment. It also contains support offices with a small restroom and a storage area for equipment, parts and other items.

**EXTERIOR FINISHES**

It is important to maintain the finish, weather resistance and appearance of the building. This project recommends work to protect the exterior building envelope, other than the roof, including painting, staining, or other applied finishes, and caulking around windows, flashing, fixtures, and other penetrations to maintain the building in good, weather tight condition. It is recommended that this project be implemented in the next 4 to 5 years and is recommended on a cyclical basis based on environmental conditions.

**INTERIOR FINISHES**

The interior finishes are in fair condition. It is recommended that the interior walls be painted at least once in the next three to four years. Prior to painting, all surfaces should be repaired and prepped. An epoxy-based paint should be utilized in wet areas for durability.

**BUILDING INFORMATION:**

- Gross Area (square feet): 2,692
- Year Constructed: 1988
- Exterior Finish 1: 100% Metal Siding
- Exterior Finish 2: 
- Number of Levels (Floors): 2
- Basement?: No
- IBC Occupancy Type 1: 100% S-1

14-May-14
The Wood Shop is an engineered structure with metal siding and roofing on a concrete slab-on-grade. The interior is painted gypsum board on three sides. It is located on the east side of the Shop building and is used by staff and inmates for woodwork related projects.

**PRIORITY CLASS 1 PROJECTS**

**EXIT SIGN & EGRESS LIGHTING UPGRADE**

The existing exit signs in this building are non-illuminated and should be replaced with new self-illuminated or LED style signs with a battery-backup. Emergency exit lighting should be installed and/or replaced to provide illumination along the egress route. This project would provide for two emergency lights and one exit sign including required electrical connections and installation. This project or a portion there of was previously recommended in the FCA report dated 09/19/2000 and 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 9/17/2013.

**INSTALL DUST COLLECTION SYSTEM**

The existing wood working equipment has partial dust collection capacity. In order to reduce the possibility of damage or injury, each piece of equipment should have complete collection capability. This project will provide for the replacement of the existing system and installation of additional capacity to minimize explosion hazard and disruption to production. This project or a portion there of was previously recommended in the FCA report dated 09/19/2000 and 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 9/17/2013.

**PRIORITY CLASS 2 PROJECTS**

**EXTERIOR FINISHES**

It is important to maintain the finish, weather resistance and appearance of the building. This project recommends work to protect the exterior building envelope, other than the roof, including painting, staining, or other applied finishes, and caulking around windows, flashing, fixtures, and other penetrations to maintain the building in good, weather tight condition. It is recommended that this project be implemented in the next 4 to 5 years and is recommended on a cyclical basis based on environmental conditions.

NDF TOOL SHED
BUILDING REPORT

The Tool Shed is an engineered steel structure with metal siding and roofing on a concrete slab-on-grade. It is located on the east side of the Wood Shop building and is used for tool storage for camp inmates and employees.

PRIORITY CLASS 1 PROJECTS
Currently Critical
Total Construction Cost for Priority 1 Projects: $1,500
Immediate to Two Years

ELECTRICAL WIRING
The building wiring is a nonmetallic sheathed cable. Nevada State Public Works Board Adopted Standards requires "All building interior power, telephone, signal and other low voltage wiring (whether plenum-rated or not) shall be installed in raceways" 8.4.1. This project would provide funding to rewire the electrical outlets in raceways. This project or a portion there of was previously recommended in the FCA report dated 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 9/17/2013.

PRIORITY CLASS 2 PROJECTS
Necessary - Not Yet Critical
Two to Four Years

EXTERIOR FINISHES
It is important to maintain the finish, weather resistance and appearance of the building. This project recommends work to protect the exterior building envelope, other than the roof, including painting, staining, or other applied finishes, and caulking around windows, flashing, fixtures, and other penetrations to maintain the building in good, weather tight condition. It is recommended that this project be implemented in the next 4 to 5 years and is recommended on a cyclical basis based on environmental conditions.

**Total Construction Cost for Priority 1 Projects:** $53,250
INSTALL LEVER ACTION DOOR HANDLES

The existing door handles in the building are older round type and do not meet the ADA requirements for grasping. This project would provide for new lever action door hardware to be installed on all doors. The 2012 IBC, ICC/ANSI A117.1 - 2009, NRS 338.180 and the most current version of the ADA Standards For Accessible Design were used as a reference for this project. This project or a portion there of was previously recommended in the FCA report dated 09/19/2000 and 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 09/17/2013.

REPLACE WATER HEATER

The average life span of a water heater is eight to ten years. With the passage of time and constant use, this unit is showing signs of wear. It is recommended that a new gas fired water heater be installed for more efficient use of energy. This estimate includes: 100 feet of gas pipe, fittings, couplers, bracing and labor for installation. This project or a portion there of was previously recommended in the FCA report dated 09/19/2000 and 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date 09/17/2013.

SIGNAGE FOR ADA COMPLIANCE

Americans with Disabilities Act (ADA) regulations pertaining to building access has established building signage criteria for permanent spaces in buildings. The criteria includes: sign mounting heights and locations; character heights and proportions; raised and Braille characters/pictograms; and sign contrast and finish. The signage in this facility does not comply with these criteria. This project would provide funding for the purchase and installation of new signage to meet the criteria for ADA. The 2012 IBC, ICC/ANSI A117.1 - 2009, NRS 338.180 and the most current version of the ADA Standards For Accessible Design were used as a reference for this project. This project or a portion there of was previously recommended in the FCA report dated 09/19/2000 and 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 09/17/2013.

WINDOW REPLACEMENT

The rear exit door has a wire glass window that is broken. This project would provide funding for the removal and replacement of the wire glass window. This project or a portion there of was previously recommended in the FCA report dated 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 09/17/2013.

PRIORITY CLASS 3 PROJECTS

Long-Term Needs Four to Ten Years

Total Construction Cost for Priority 3 Projects: $8,860

INTERIOR FINISHES

The interior finishes are in fair condition. It is recommended that the interior walls be painted at least once in the next four to six years. Prior to painting, all surfaces should be repaired and prepped. An epoxy-based paint should be utilized in wet areas for durability. This project or a portion there of was previously recommended in the FCA report dated 09/19/2000 and 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 09/17/2013.

CCC MULTI-PURPOSE BUILDING

BUILDING REPORT

The Carlin Conservation Camp Multi-Purpose Building is an engineered steel structure with metal siding, metal roof on a concrete slab-on-grade foundation. The building contains a Gymnasium, Laundry Room, Mechanical Room and Storage areas. The facility has an older fire sprinkler system and a new fire alarm system. The Gym area has a couple of ceiling mounted gas fired heating units and a mix of electric and hydronic heating units for the laundry and storage areas. It also has a single use restroom that is not ADA accessible.

PRIORITY CLASS 1 PROJECTS

<table>
<thead>
<tr>
<th>Currently Critical</th>
<th>Immediate to Two Years</th>
</tr>
</thead>
</table>
| ADA RESTROOM REMODEL | Project Index #: 1580ADA1
Construction Cost: $15,000 |

Two restrooms are present in this building. They do not meet the Americans with Disabilities Act (ADA) regulations. This project would provide funding for remodeling one of the restrooms into a unisex restroom for ADA compliance. These items may include new sinks, toilets, urinals, partitions, hardware, mirrors, fixtures, accessible showers, flooring and paint. The 2012 IBC, ICC/ANSI A117.1 - 2009, NRS 338.180 and the most current version of the ADA Standards For Accessible Design were used as a reference for this project. This project or a portion there of was previously recommended in the FCA report dated 09/19/2000 and 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 9/17/2013.

EXIT SIGN & EGRESS LIGHTING UPGRADE

| Project Index #: 1580SFT1
Construction Cost: $1,600 |

The existing exit signs in this building are non-illuminated or the older type style and should be replaced with new self-illuminated or LED style signs with a battery-backup. Emergency exit lighting should be installed and/or replaced to provide illumination along the egress route. This project would provide for 3 emergency lights and three exit signs including required electrical connections and installation.

This project or a portion there of was previously recommended in the FCA report dated 09/19/2000 and 9/29/2005. It has been amended accordingly to reflect conditions observed during the recent survey date of 9/17/2013.

OVERHEAD DOOR REPLACEMENT

| Project Index #: 1580EXT1
Construction Cost: $15,500 |

The existing 10’x16’ sectional overhead door is damaged from abuse and is original to the building. It has holes, bent panels, and no longer operates properly. This project would provide funding for removal and disposal of the old overhead door and the purchase and installation of a new insulated sectional overhead door with a motor, including connections to utilities as required. This project or a portion there of was previously recommended in the FCA report dated 09/19/2000 and 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date 09/17/2013.

SIGNAGE FOR ADA COMPLIANCE

| Project Index #: 1580ADA2
Construction Cost: $3,750 |

Americans with Disabilities Act (ADA) regulations pertaining to building access has established building signage criteria for permanent spaces in buildings. The criteria includes: sign mounting heights and locations; character heights and proportions; raised and Braille characters/pictograms; and sign contrast and finish. The signage in this facility does not comply with this criteria. This project would provide funding for the purchase and installation of new signage to meet the criteria for ADA. The 2012 IBC, ICC/ANSI A117.1 - 2009, NRS 338.180 and the most current version of the ADA Standards For Accessible Design were used as a reference for this project. This project or a portion there of was previously recommended in the FCA report dated 09/19/2000 and 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 9/17/2013.
### STRUCTURAL ASSESSMENT

An upper level storage mezzanine has been constructed inside of the multi-purpose building. The 2012 IBC has a minimum requirement of 125 p.s.f. for light storage in non-residential spaces. There is no record of a CIP project or structural plans for this construction and could be a potential safety issue due to collapse. This project recommends that a licensed engineer perform a structural investigation to assess the load carrying capacity of this area. Future projects would be based on this report. This project or a portion there of was previously recommended in the FCA report dated 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 9/17/2013.

### PRIORITY CLASS 2 PROJECTS

<table>
<thead>
<tr>
<th>Project Index</th>
<th>Construction Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>1580STR1</td>
<td>$2,500</td>
</tr>
</tbody>
</table>

**Total Construction Cost for Priority 2 Projects:** $52,900

**Priority Class 2 Projects:** Necessary - Not Yet Critical  Two to Four Years

### EVAPORATIVE COOLER REPLACEMENT

The building has a side discharge evaporative cooler. The cooler is beginning to rust and alkaline has scaled the unit to the point of plugging up the fins. This project would provide funding for the purchase and installation of a new side discharge evaporative cooler. This project or a portion there of was previously recommended in the FCA report dated 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 9/17/2013.

**Project Index #:** 1580HVA1  
**Construction Cost:** $2,500

### EXTERIOR DOOR REPLACEMENT

The two existing exterior doors, frames and locks appear to be original to the building. They are showing signs of wear and deterioration from constant use and abuse. The frames are damaged as well as the hinges. Because of security concerns and the condition of the doors, this project would provide funding to replace the doors, frames, locks and hardware including paint. This project or a portion there of was previously recommended in the FCA report dated 09/19/2000 and 9/29/2005. It has been amended accordingly to reflect conditions observed during the recent survey date of 9/17/2013.

**Project Index #:** 1580SEC1  
**Construction Cost:** $7,000

### INTERIOR FINISHES

The interior finishes are in fair condition. It is recommended that the interior walls and ceilings be painted at least once in the next two to three years and every 5 to 7 years thereafter to maintain the integrity of the interior of the building. Prior to painting, all surfaces should be repaired and prepped. An epoxy-based paint should be utilized in wet areas for durability.

**Project Index #:** 1580INT2  
**Construction Cost:** $28,000

### LIGHTING UPGRADE

Existing building lighting fixtures, T-12s, are older fluorescent types and not energy efficient. This project will upgrade lighting fixtures to T-8 lamps with electronic ballasts, resulting in increased efficiency and reduced costs associated with illumination. This project or a portion there of was previously recommended in the FCA report dated 09/19/2000 and 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date 09/17/2013.

**Project Index #:** 1580ENR1  
**Construction Cost:** $10,500

### MINOR ELECTRICAL REPAIRS

The building has numerous electrical outlets and switches which are missing covers or broken, have extension cords being used to supply electrical power, and no GFCI outlets. This project would provide for repairs and/or replacement by a licensed contractor to repair and/or replace the damaged electrical outlets, switches, covers and conduit. This project or a portion there of was previously recommended in the FCA report dated 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date 09/17/2013.

**Project Index #:** 1580ELE2  
**Construction Cost:** $2,500
WINDOW REPLACEMENT

There are three small old single pane window units that should be scheduled for replacement. This project would provide for the installation of three new insulated window units. Removal and disposal of the old units is included in this estimate.

PRIORITY CLASS 3 PROJECTS

Total Construction Cost for Priority 3 Projects: $7,000
Long-Term Needs Four to Ten Years

EXTERIOR FINISHES

It is important to maintain the finish, weather resistance and appearance of the building. This project recommends work to protect the exterior building envelope, other than the roof, including painting, metal siding repairs, or other applied finishes, and caulking around windows, flashing, fixtures, and other penetrations to maintain the building in good, weather tight condition. It is recommended that this project be implemented in the next 4 to 5 years and is recommended on a cyclical basis based on environmental conditions.

BUILDING INFORMATION:

Gross Area (square feet): 7,000
Year Constructed: 1990
Exterior Finish 1: 100 % Metal Siding
Exterior Finish 2: %
Number of Levels (Floors): 1  Basement: No
IBC Occupancy Type 1: 60 % A-3
IBC Occupancy Type 2: 40 % I-3
Construction Type: Engineered Steel Structure
IBC Construction Type: III-B
Percent Fire Suppressed: 100 %

PROJECT CONSTRUCTION COST TOTALS SUMMARY:

Priority Class 1: $38,350  Project Construction Cost per Square Foot: $14.04
Priority Class 2: $52,900  Total Facility Replacement Construction Cost: $1,050,000
Priority Class 3: $7,000  Facility Replacement Cost per Square Foot: $150
Grand Total: $98,250  FCNI: 9%
The Carlin Conservation Camp Housing Unit is a wood framed modular structure with painted T1-11 siding, asphalt composition roof resting on a concrete masonry unit foundation. The building consists of three wings, A wing, B wing and C wing which contain sleeping areas and restrooms, culinary and dining facilities, visitor area and support offices for staff. A new ADA accessible ramp into the main entrance has been installed but the housing unit's restrooms and dining area are not ADA compliant. There is a new fire alarm system but the facility is lacking a fire sprinkler system. Two gas fired boilers provide hot water for the heat and there are roof mounted evaporative coolers.

**PRIORITIZED TOTAL CONSTRUCTION COST**

**Total Construction Cost for Priority 1 Projects:** $300,663

**Immediate to Two Years**

**ADA RESTROOM REMODEL**

Restrooms are present in this building. They do not meet the Americans with Disabilities Act (ADA) regulations. This project would provide funding for remodeling one of the restrooms for ADA compliance. These items may include new sinks, toilets, urinals, partitions, hardware, mirrors, fixtures, accessible showers, flooring and paint. The 2012 IBC, ICC/ANSI A117.1 - 2009, NRS 338.180 and the most current version of the ADA Standards For Accessible Design were used as a reference for this project. This project or a portion there of was previously recommended in the FCA report dated 09/19/2000 and 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 9/17/2013.

**FIRE SUPPRESSION SYSTEM INSTALLATION**

This building does not have an automatic fire suppression system. This building has more than 12,000 square feet on the first floor. NAC 477.917 indicates every existing building owned by the State of Nevada must:

- (a) Comply with the provisions of NRS 477.100 to 477.170, inclusive;
- (b) Meet the requirements of the building code in effect when the building was constructed;
- (c) If the building:
  - (1) Is designated as a B occupancy;
  - (2) Regardless of occupancy designation, has a floor area which exceeds 12,000 square feet on any floor or 24,000 square feet on all floors, including any mezzanines; or
  - (3) Is an R-1, R-2 or R-4 occupancy be scheduled for installation of an automatic fire suppression system during the next remodeling of or addition to the building.

This project or a portion there of was previously recommended in the FCA report dated 09/19/2000 and 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 9/17/2013.

**HANDRAIL INSTALLATION**

There are two exterior sets of stairs which are lacking handrails. The 2012 IBC Chapter 10, Section 1012 outlines the requirements for handrails. This project would provide for the installation of handrails on each side of the exterior stairs an two locations.

**REPLACE FLOORING**

The flooring in this building consists of carpet in the living and office areas, VCT (vinyl composite tile) in the corridors and bathrooms, and ceramic tile in the culinary area. These floor finishes are reaching the end of their useful life. The tile in the culinary has numerous areas missing tiles. It is recommended that the flooring in the building be replaced. This project or a portion there of was previously recommended in the FAC report dated 09/19/2000 and 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 09/17/2013.
SIGNAGE FOR ADA COMPLIANCE

Americans with Disabilities Act (ADA) regulations pertaining to building access has established building signage criteria for permanent spaces in buildings. The criteria includes: sign mounting heights and locations; character heights and proportions; raised and Braille characters/pictograms; and sign contrast and finish. The signage in this facility does not comply with these criteria. This project would provide funding for the purchase and installation of new signage to meet the criteria for ADA. The 2012 IBC, ICC/ANSI A117.1 - 2009, NRS 338.180 and the most current version of the ADA Standards For Accessible Design were used as a reference for this project. This project or a portion there of was previously recommended in the FCA report dated 09/19/2000 and 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 09/17/2013.

BOILER REPLACEMENT

There are two gas fired boilers that are original to the housing unit and are reaching the end of their expected life. This project would provide for 2 new gas fired boilers to be installed. Removal of the old boilers and connection to existing utilities is also included in this estimate.

EXTERIOR DOOR REPLACEMENT

The existing exterior doors and locks appear to be original to the building. They are showing signs of wear and deterioration from constant use and abuse. The frames are damaged as well as the hinges. Because of security concerns and the door's condition, this project would provide funding to replace the door, frame, locks and hardware, typical of 8. This project or a portion there of was previously recommended in the FCA report dated 09/19/2000 and 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 09/17/2013.

EXTERIOR FINISHES

It is important to maintain the finish, weather resistance and appearance of the building. This project recommends work to protect the exterior building envelope, other than the roof, including painting, staining, or other applied finishes, and caulking around windows, flashing, fixtures, and other penetrations to maintain the building in good, weather tight condition. It is recommended that this project be implemented in the next 4 to 5 years and is recommended on a cyclical basis based on environmental conditions.

INTERIOR FINISHES

The interior finishes are in fair condition. It is recommended that the interior walls and ceilings be painted at least once in the next two to three years and every 5 to 7 years thereafter to maintain the integrity of the interior of the building. Prior to painting, all surfaces should be repaired and prepped. An epoxy-based paint should be utilized in wet areas for durability.

ROOF-MOUNTED EVAPORATIVE COOLER REPLACEMENT

There are 7 evaporative coolers installed on the roof of this building. It appears that they have reached the end of their useful life. It is recommended that the evaporative coolers be replaced. Connection to the existing utilities is included in this estimate This project or a portion there of was previously recommended in the FCA report dated 09/19/2000 and 9/29/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 09/17/2013.
PRIORITY CLASS 3 PROJECTS

Long-Term Needs Four to Ten Years

Total Construction Cost for Priority 3 Projects: $4,800

SHOWER EXHAUST FAN REPLACEMENT

Many of the exhaust fans in the restrooms and shower area were damaged, missing covers and inoperative. This project would provide for the removal of the existing exhaust fan assembly and the purchase and installation of 6 exhaust fan assemblies including ducting and connections to utilities. Due to excessive humidity concerns, high volume commercial units should be installed. This project thereof was previously recommended in the FAC report dated 09/19/2005. It has been amended accordingly to reflect conditions observed during the most recent survey date of 09/17/2013.

BUILDING INFORMATION:

- Gross Area (square feet): 13,477
- Year Constructed: 1988
- Exterior Finish 1: 100% Painted Wood Siding
- Exterior Finish 2: %
- Number of Levels (Floors): 1
- Basement? No
- IBC Occupancy Type 1: 100% I-3
- IBC Occupancy Type 2: %
- Construction Type: Wood Framing
- IBC Construction Type: V-B
- Percent Fire Suppressed: 0%

PROJECT CONSTRUCTION COST TOTALS SUMMARY:

- Priority Class 1: $300,663
- Project Construction Cost per Square Foot: $37.79
- Priority Class 2: $203,770
- Total Facility Replacement Construction Cost: $3,369,000
- Priority Class 3: $4,800
- Facility Replacement Cost per Square Foot: $250
- Grand Total: $509,233
- FCNI: 15%

NOTES:

The deficiencies outlined in this report were noted from a visual survey. The costs do not represent the cost of a complete facility renovation or maintenance needs. Recommended projects do not include telecommunications, furniture, window treatment, space change, program issues, relocation, swing space, or costs that could not be identified or determined from the survey and available building information.

Individual projects and costs noted herein may be impacted by new construction materials or methods, agency projects, and pending or proposed Capital Improvement Projects (CIP).

This report was created under the authority found in NRS 341.128 by the State Public Works Division and should be utilized as a planning level document.
