Site Number: 9976
STATE OF NEVADA PUBLIC WORKS DIVISION
FACILITY CONDITION ANALYSIS

Report distributed in May 2021
The Facility Condition Analysis Program was created under the authority found in NRS 341.128. The State Public Works Division develops this report using cost estimates based on contractor pricing which includes materials, labor, location factors and profit and overhead. The costs of project design, management, special testing and inspections, inflation and permitting fees are not included. Cost estimates are derived from the R.S. Means Cost Estimating Guide and from comparable construction costs of projects completed by SPWD project managers.

The deficiencies outlined in this report were noted from a visual survey. This report does not address routine maintenance needs. Recommended projects do not include telecommunications, furniture, window treatments, space change, program issues, or costs that could not be identified or determined from the survey and available building information. If there are buildings without projects listed, this indicates that only routine maintenance needs were found. This report considers probable facility needs for a 10 year planning cycle.

This report is not a guarantee of funding and should not be used for budgeting purposes. This report is a planning level document for agencies and State Public Works Division to assess the needs of the Building and/or Site and to help support future requests for ADA upgrades/renovations, Capital Improvement Projects, and maintenance. The final scope and estimate of any budget request should be developed by a qualified individual. Actual project costs will vary from those proposed in this report when the final scope and budget are developed.

Establishing a Facility Condition Needs Index (FCNI) for each building

The FCA reports identify maintenance items and establish construction cost estimates. These costs are summarized at the end of the report and noted as construction costs per square foot. A FCNI is commonly used by facility managers to make a judgment whether to recommend whole replacement of facilities, rather than expending resources on major repairs and improvements. The FCNI is a ratio between the proposed facility upgrade costs and facility replacement costs (FRC). Those buildings with indices greater than .50 or 50% are recommended to be considered for complete replacement.

Class Definitions

**PRIORITY CLASS 1 - Currently Critical (Immediate to Two Years)**

Projects in this category require immediate action to return a facility to normal operation, stop accelerated deterioration, correct a fire/life safety hazard, or correct an ADA requirement.

**PRIORITY CLASS 2 - Necessary - Not Yet Critical (Two to Four Years)**

Projects in this category include conditions requiring appropriate attention to preclude predictable deterioration or potential downtime and the associated damage or higher costs if deferred further.

**PRIORITY CLASS 3 - (Four to Ten Years)**

Projects in this category include items that represent a sensible improvement to existing conditions. These items are not required for the most basic function of a facility; however, Priority 3 projects will either improve overall usability and/or reduce long-term maintenance.

ELY CONSERVATION CAMP SITE
BUILDING REPORT

The Ely Conservation Camp is a minimum security prison located about 35 miles south of Ely. This camp contains 10 support buildings and is shared with the Nevada Division of Forestry's conservation camp program. The site utilities include a well and storage tank, electricity, propane and a septic system with leach field. This camp is administered through the warden of Ely State Prison. There is a paved parking area for staff and visitors that contains an ADA accessible parking area.

PRIORITY CLASS 1 PROJECTS

<table>
<thead>
<tr>
<th>Currently Critical</th>
<th>Immediate to Two Years</th>
</tr>
</thead>
</table>

ADA PARKING SPACE

The Americans with Disabilities Act (ADA) provides for accessibility to sites and services for people with physical limitations. A concrete parking area and passenger loading area are necessary to comply with ADA requirements. This project would provide for a concrete van accessible ADA parking and loading space and walkway to the existing sidewalk. 1,000 square feet of concrete was used for this estimate. Signage and striping are included. IBC - 2018, ICC/ANSI A117.1 - 2009 and Americans with Disabilities Act Accessibility Guidelines (ADAAG) - 2009 were referenced for this project.

This project or a portion thereof was previously recommended in the FCA report dated 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

Project Index #: 9976ADA1
Construction Cost $31,400

INSTALL NEW SEPTIC SYSTEM

The existing septic system backs-up frequently and requires frequent pumping. Visual inspection of the septic tanks and leach field piping at the time of the survey showed that the system was virtually inoperable. This project provides funding for abandonment of the existing system and installation of new septic tanks and leach fields for the facility. The system must comply with local, State and Federal environmental laws.

This project or a portion thereof was previously recommended in the FCA report dated 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

Project Index #: 9976PLM1
Construction Cost $141,000

PRIORITY CLASS 2 PROJECTS

<table>
<thead>
<tr>
<th>Necessary - Not Yet Critical</th>
<th>Two to Four Years</th>
</tr>
</thead>
</table>

INSTALL POLE LIGHTING AROUND PARKING LOT

The entrance road and parking area have insufficient lighting. Considering the environment of the site, this area needs to be well lit. This project would provide funding for purchase and installation of twelve 30 foot tall light poles including 30" diameter raised concrete bases, electrical trenching, conduit, wiring and connections to existing utilities.

This project or a portion thereof was previously recommended in the FCA report dated 08/21/2000 and 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

Project Index #: 9976SEC1
Construction Cost $137,300

PATCH / SLURRY SEAL ASPHALT PAVING

It is important to maintain the asphalt concrete paving on the site. This project would provide for patching, minor crack filling and slurry sealing of the paving site wide including loading zones, access roads and parking areas. Striping is included in this estimate. This project should be scheduled on a 5 year cyclical basis to maintain the integrity of the paving and prevent premature failure. This project should coincide with the ADA parking project.

This project or a portion thereof was previously recommended in the FCA report dated 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

Project Index #: 9976SIT2
Construction Cost $50,000

Total Construction Cost for Priority 1 Projects: $172,400
Total Construction Cost for Priority 2 Projects: $194,700
SITE BOLLARDS

There are four above ground propane tanks on the site that do not have adequate bollard coverage. Per International Fire Code 2018 Section 312 Vehicle Impact Protection, there needs to be steel posts installed, not less than 4 inches in diameter and filled with concrete. The spacing shall not be more than 4 feet between posts on center and located not less than 3 feet from each gas tank. This project would provide funding for six new bollards to be located in-between the other bollards around the tanks.

The Maintenance Shop is a wood framed structure with T1-11 painted siding and an asphalt shingle roof. The building is located on the north side of the Multi-Purpose building.

**PRIORITY CLASS 3 PROJECTS**

**Total Construction Cost for Priority 3 Projects:** $4,410

**Long-Term Needs**

**Four to Ten Years**

**Project Index #:** 2728EXT1

**Construction Cost** $4,410

**EXTERIOR FINISHES**

The exterior finishes are in good condition. It is important to maintain the finish, weather resistance, and appearance of the building. This project recommends work to protect the exterior building envelope, other than the roof, including painting, staining or other applied finishes, and caulking around windows, flashing, fixtures, and other penetrations to maintain the building in good, weather tight condition. It is recommended that this project be implemented in the next 8 to 9 years and for it to be scheduled on a cyclical basis based on environmental conditions.

MULTI-PURPOSE/GYMNASIUM
BUILDING REPORT

The Multi-Purpose/Gymnasium is an insulated engineered steel building which contains a large gym area, offices and restrooms on the lower level and offices and storage rooms upstairs. The facility is in fair condition.

PRIORITY CLASS 1 PROJECTS

Currently Critical | Immediate to Two Years

Total Construction Cost for Priority 1 Projects: $76,900

ADA RESTROOM REMODEL

The restroom does not meet the Americans with Disabilities Act (ADA) regulations. A retrofit is necessary to comply with ICC/ANSI A117.1-1998 Sections 603 - 604 and 2018 ICC Chapter 11. Given the current configuration of the restroom, the work will include the installation of a new toilet, sink, grab bars, faucet, mirror, dispensers, and door hardware. Some minor design work will be required and may impact the final cost estimate. This estimate is for one Men's restroom facility. The removal and disposal of the old restroom fixtures is included in this estimate.

This project or a portion thereof was previously recommended in the FCA report dated 08/21/2000 and 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

Construction Cost: $70,500

PROJECT INDEX #: 1389ADA1

EXIT SIGN & EGRESS LIGHTING UPGRADE

The existing exit signs in this building are older types and should be replaced with new self-illuminated or LED style signs with battery-backed internal systems. Emergency exit lighting should be installed and/or replaced to provide illumination along the egress route.

This project or a portion thereof was previously recommended in the FCA report dated 08/21/2000 and 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

Construction Cost: $2,100

PROJECT INDEX #: 1389SFT1

LAUNDRY ROOM REPAIRS

The Laundry Room has a base board heater installed in the wall due to the inadequate heating of the building. When the ceiling mounted heating units are replaced, this base board heater should be removed and the gypsum board repaired. The base board heater poses a fire risk as it is currently installed and is not an acceptable solution to the heating inefficiencies.

This project or a portion thereof was previously recommended in the FCA report dated 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

Construction Cost: $1,500

PROJECT INDEX #: 1389SFT2

SIGNAGE FOR ADA COMPLIANCE

The building is lacking ADA signage. Americans with Disabilities Act (ADA) regulations pertaining to parking, building access, route of travel and restrooms has established building signage criteria for permanent spaces in buildings. The criteria includes sign mounting heights and locations; character heights and proportions; raised and Braille characters/pictograms; and sign contrast and finish. This project would provide funding for purchase and installation of ADA signage including directional signage from parking to accessible building entrances, route of travel inside the building and restrooms. IBC - 2018, ICC/ANSI A117.1 - 2003 and Americans with Disabilities Act Accessibility Guidelines (ADAAG) - 2003 were referenced for this project.

This project or a portion thereof was previously recommended in the FCA report dated 08/21/2000 and 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

Construction Cost: $2,800

PROJECT INDEX #: 1389ADA2
**INTERIOR FINISHES**

The interior finishes are in poor condition. It is recommended that the interior walls and ceilings be painted at least once in the next 2 to 3 years and every 5 to 7 years thereafter to maintain the integrity of the interior of the building. Prior to painting, all surfaces should be repaired and prepped. An epoxy-based paint should be utilized in wet areas for durability. This project or a portion thereof was previously recommended in the FCA report dated 08/21/2000 and 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

**LIGHTING UPGRADE**

The existing lighting fixtures are the older fluorescent type and are not energy efficient. This project will upgrade fixtures to higher efficiency units with a longer life cycle. 5,000K LED lamps, without the ballasts, are suggested, and new tombstones (if needed). Occupancy sensors will be installed in low occupancy areas for additional savings. Any electrical wiring upgrades are not included in this estimate.

**REBUILD HANDRAILS / GUARDRAILS**

The handrails and guardrails at the stairway and storage mezzanine do not meet the building code requirements in their current configuration. This project would provide for the removal of the existing wood framed railing and replacement with new wood framed handrails and guardrail that will meet the 2018 IBC code Chapter 10, Section 1012 and 1013. This project or a portion thereof was previously recommended in the FCA report dated 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

**REPLACE CEILING MOUNTED HEATERS**

The building is heated by three ceiling mounted gas unit heaters. They are original to the building and are reaching the end of their useful life. This project provides for disposal of the existing units and replacement of the existing units and associated utility connections.

This project or a portion thereof was previously recommended in the FCA report dated 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

**REPLACE OVERHEAD COILING DOOR**

There is a 12’x12’ overhead coiling door which is damaged and does not function properly. It is original to the building and should be scheduled for replacement. This project would provide for the removal and replacement of the manually operated overhead coiling door.

This project or a portion thereof was previously recommended in the FCA report dated 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

**REPLACE WATER HEATER**

The average life span of a water heater is eight to ten years. The existing 100 gallon propane water heater will be reaching the end of its expected life and should be scheduled for replacement. This project would provide for the removal of the existing water heater and the replacement with a new water heater including required connections to utilities.

This project or a portion thereof was previously recommended in the FCA report dated 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.
PRIORITY CLASS 3 PROJECTS

Total Construction Cost for Priority 3 Projects: $33,715

Long-Term Needs

Four to Ten Years

EXTERIOR FINISHES

The non-prefinished painted surfaces are in fair condition. It is important to maintain the finish, weather resistance, and appearance of the building. This project recommends work to protect the exterior building envelope, other than the roof, including painting, staining or other applied finishes, and caulking around windows, flashing, fixtures, and other penetrations to maintain the building in good, weather tight condition. It is recommended that this project be implemented in the next 4 to 5 years and for it to be scheduled on a cyclical basis based on environmental conditions.

BUILDING INFORMATION:

- Gross Area (square feet): 6,743
- Year Constructed: 1987
- Exterior Finish 1: 100% Metal Siding
- Exterior Finish 2: %
- Number of Levels (Floors): 2
- Basement?: No
- IBC Occupancy Type 1: 70% A-3
- IBC Occupancy Type 2: 30% B
- Construction Type: Engineered Steel Building
- IBC Construction Type: V-B
- Percent Fire Suppressed: 0%

PROJECT CONSTRUCTION COST TOTALS SUMMARY:

- Priority Class 1: $76,900
- Priority Class 2: $98,700
- Priority Class 3: $33,715
- Grand Total: $209,315
- Project Construction Cost per Square Foot: $31.04
- Total Facility Replacement Construction Cost: $1,686,000
- Facility Replacement Cost per Square Foot: $250
- FCNI: 12%
ADMINISTRATION/HOUSING/CULINARY
BUILDING REPORT

The Administration/Housing/Culinary is a wood framed structure on a concrete foundation. It contains housing areas, culinary and dining facilities, restrooms and administration offices. This building does not have a fire sprinkler system and is non-ADA compliant. The building is in good shape.

<table>
<thead>
<tr>
<th>PRIORITY CLASS 1 PROJECTS</th>
<th>Total Construction Cost for Priority 1 Projects: $332,300</th>
</tr>
</thead>
<tbody>
<tr>
<td>Currently Critical</td>
<td>Immediate to Two Years</td>

</tbody>
</table>

**EXTERIOR LANDING INSTALLATION**

Section 1008.1 of the 2018 IBC describes the requirements for doors including floor elevations and landings. The floor or landing shall be at the same elevation on each side of the door, the exterior landing shall not exceed a 2-percent slope and shall have a length measured in the direction of travel of not less than 44 inches. The landing at the door on the building does not comply with this code and poses a safety hazard. This project would provide for the installation of a compliant landing for the door.

- **Project Index #:** 1388SFT6
- **Construction Cost:** $12,400

**FIRE ALARM SYSTEM UPGRADE**

This building is equipped with an automatic fire detection and alarm system that no longer complies with current requirements. It is recommended that the system be upgraded to current requirements to ensure the safety of the occupants. Also, according to NAC 477.917 "If the value of individual or cumulative additions, alterations and repairs to a building or structure in any 12-month period exceeds 50 percent of the value of the building or structure at the commencement of the 12-month period, the building or structure must conform to the requirements for a new building or structure". When completed, the new system will provide visual, as well as audible notification, in accordance with the 2018 IBC Chapter 9, Section 907 and the State Fire Marshal's requirements.

- **Project Index #:** 1388SFT5
- **Construction Cost:** $70,300

**GFCI DUPLEX OUTLET REPLACEMENT**

There are 6 outlets in the restrooms which are not GFCI protected outlets. These outlets are near sinks requiring the outlets to be protected. This project would provide for the purchase and installation of 6 new GFCI duplex outlets. This project or a portion thereof was previously recommended in the FCA report dated 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

- **Project Index #:** 1388SFT4
- **Construction Cost:** $1,500

**INSTALL FIRE SUPPRESSION SYSTEM**

This building does not have an automatic fire suppression system. Nevada State Fire Marshal NRS 477.915 (c) requires buildings having a floor area exceeding 12,000 s.f. on any floor or 24,000 s.f. on all floors, or which contain a B or R-1 occupancy, be scheduled for installation of an automatic fire suppression system during the next remodeling of, or addition to the building. Backflow prevention is included in this estimate. This building exceeds 12,000 s.f. and is partially classified as a B occupancy.

This project or a portion thereof was previously recommended in the FCA report dated 08/21/2000 and 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

- **Project Index #:** 1388SFT3
- **Construction Cost:** $245,300
SIGNAGE FOR ADA COMPLIANCE

The building is lacking ADA signage. Americans with Disabilities Act (ADA) regulations pertaining to parking, building access, route of travel and restrooms has established building signage criteria for permanent spaces in buildings. The criteria includes sign mounting heights and locations; character heights and proportions; raised and Braille characters/pictograms; and sign contrast and finish. This project would provide funding for purchase and installation of ADA signage including directional signage from parking to accessible building entrances, route of travel inside the building and restroom. IBC - 2018, ICC/ANSI A117.1 - 2003 and Americans with Disabilities Act Accessibility Guidelines (ADAAG) - 2003 were referenced for this project.

This project or a portion thereof was previously recommended in the FCA report dated 08/21/2000 and 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

PRIORITY CLASS 2 PROJECTS

Total Construction Cost for Priority 2 Projects: $2,427,000

Necessary - Not Yet Critical Two to Four Years

EXTERIOR DOOR REPLACEMENT

The existing exterior commercial grade metal door assemblies appear to be original to the building. They are showing signs of wear and deterioration from constant use and abuse. Due to security concerns and the condition of the doors, this project recommends the installation of new metal doors, frames and hardware and includes the disposal of the existing door assemblies.

This project or a portion thereof was previously recommended in the FCA report dated 08/21/2000 and 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

HEATING CONTROLS REPLACEMENT AND UPGRADE

The existing heating system controls are malfunctioning or inoperative. This project will provide a new master panel with remote monitoring, pulling new wire, associated controls and thermostats.

This project or a portion thereof was previously recommended in the FCA report dated 08/21/2000 and 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

LIGHTING UPGRADE

The existing lighting fixtures are the older fluorescent type and are not energy efficient. This project will upgrade fixtures to higher efficiency units with a longer life cycle. 5,000K LED lamps, without the ballasts, are suggested, and new tombstones (if needed). Occupancy sensors will be installed in low occupancy areas for additional savings. Electrical wiring upgrades are not included in this estimate.

NONABSORBANT FINISHES

2018 IBC Section 1210 requires the installation of smooth, hard, nonabsorbent surfaces in the following restroom areas: on floors in toilet and bathing rooms that extend upward onto the walls at least 6 inches, within 2 feet of the sides of urinals and water closets to a height of 4 feet above the floor and in shower compartments to a height not less than 70 inches above the drain inlet. This project recommends the installation of Fiberglass Reinforced Panel (FRP) or an equal material to comply with this code section.

This project or a portion thereof was previously recommended in the FCA report dated 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

REPAIR JANITORS CLOSET

The mop sink in the Janitors Closet is mounted adjacent to gypsum board and is showing signs of water damage. This project would provide fiberglass reinforced panels (FRP) to be installed on the walls adjacent to the mop sink. The FRP shall extend two feet beyond the edge of the sink and a minimum of 54" above the floor finish.

This project or a portion thereof was previously recommended in the FCA report dated 08/21/2000 and 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.
REPLACE DOMESTIC WATER PIPING

The domestic water piping under the building is original to the building and are beginning to fail. At the time of the survey, staff reported that the lines are continuously developing leaks. The maintenance time and loss of water is enough to warrant an entire replacement of the piping. This project would provide funding for the removal and disposal of the existing domestic water lines and installation of new domestic water supply piping. This project or a portion thereof was previously recommended in the FCA report dated 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

Project Index #: 1388PLM2
Construction Cost $105,800

REPLACE EXPANSION TANK BLADDERS

At the time of the 2007 survey, the maintenance staff reported that the bladders in the two expansion tanks had failed. It is assumed that the age of the equipment is the cause of the failure. This project provides funding for removal of the existing bladders and installation of two new bladders in the existing expansion tanks. This project or a portion thereof was previously recommended in the FCA report dated 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

Project Index #: 1388HVA4
Construction Cost $7,000

REPLACE WATER HEATERS

The average life span of a water heater is eight to ten years. The three existing 100 gallon propane water heaters in the building have reached the end of their expected life and are not energy efficient. This project would provide for the removal and disposal of the old water heaters and installation of three new 100 gallon propane water heaters. This project or a portion thereof was previously recommended in the FCA report dated 08/21/2000 and 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

Project Index #: 1388PLM1
Construction Cost $12,700

REPLACE WATER TREATMENT SYSTEMS

The existing water softening/ treatment systems in the building are currently operational, but are original to the building and approaching the end of their lifecycles. Failure of the equipment would cause wear and tear on the domestic water supply lines, plumbing fixtures and HVAC equipment. This project would provide for the replacement of the existing water softeners/ treatment systems with new equipment. This project would also provide for a chemical treatment program including an updated chemicals control system, service and employee training provided by a qualified water treatment vendor. The annual maintenance fee charged by the water treatment vendor would be determined after an investigation of the water system is complete. These annual costs are not included in this project cost. For budgeting purposes, a $12,000 fee is suggested.

This project or a portion thereof was previously recommended in the FCA report dated 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

Project Index #: 1388HVA5
Construction Cost $56,400

RESTROOM REMODEL

The bathroom and shower rooms are in overall poor condition. The countertops in each wing show signs of wear and deterioration. Extensive use, combined with repetitive water being spilled, has caused the laminate top to separate from the wooden underlayment and should be replaced. The tile on the floors and walls of the bathrooms are damaged and worn and should be replaced. This project provides for a complete remodel of the bathrooms and shower rooms. Given the current configuration of the restrooms, the work will include the installation of a new toilet, sink, grab bars, faucets, mirrors, dispensers, hardware and an accessible shower stall. Some minor design work will be required and may impact the final cost estimate. This estimate is for three Men’s restroom facilities, one in each residential wing. The removal and disposal of the old restroom fixtures is included in this estimate. This project should be coordinated with the ADA restroom project and water line replacement project. This will also address the issue with the floor not properly sloping to the drains.

This project or a portion thereof was previously recommended in the FCA report dated 12/01/2001 and 04/05/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

Project Index #: 1388INT6
Construction Cost $2,115,000

20-May-21 Page 13 of 21
PRIORITY CLASS 3 PROJECTS

Total Construction Cost for Priority 3 Projects: $209,520

Long-Term Needs

Four to Ten Years

EXTERIOR FINISHES

The exterior finishes are in good condition. It is important to maintain the finish, weather resistance, and appearance of the building. This project recommends work to protect the exterior building envelope, other than the roof, including painting, staining or other applied finishes, and caulking around windows, flashing, fixtures, and other penetrations to maintain the building in good, weather tight condition. It is recommended that this project be implemented in the next 8 to 9 years and for it to be scheduled on a cyclical basis based on environmental conditions.

Construction Cost $139,680

Project Index #: 1388EXT1

INTERIOR FINISHES

The interior finishes are in fair condition. It is recommended that the interior walls and ceilings be painted at least once in the next 4 to 5 years and every 5 to 7 years thereafter to maintain the integrity of the interior of the building. Prior to painting, all surfaces should be repaired and prepped. An epoxy-based paint should be utilized in wet areas for durability.

Construction Cost $69,840

### ADA RESTROOM REMODEL

The restroom does not meet the Americans with Disabilities Act (ADA) regulations. A retrofit is necessary to comply with ICC/ANSI A117.1-1998 Sections 603 - 604, 2018 IBC Chapter 11 and the Americans with Disabilities Act Accessibility Guidelines (ADAAG). Given the current configuration of the restroom, the work will include the installation of a new toilet, sink, grab bars, faucets, mirrors, dispensers and hardware. Some minor design work will be required and may impact the final cost estimate. This estimate is for one Unisex restroom facility. The removal and disposal of the old restroom fixtures is included in this estimate.

This project or a portion thereof was previously recommended in the FCA report dated 08/21/2000 and 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

### EXIT SIGN & EGRESS LIGHTING UPGRADE

The existing exit signs in this building are older types and should be replaced with new self-illuminated or LED style signs with battery-backed internal systems. Emergency exit lighting should be installed and/or replaced to provide illumination along the egress route.

This project or a portion thereof was previously recommended in the FCA report dated 08/21/2000 and 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

### FIRE ALARM SYSTEM UPGRADE

This building is equipped with an automatic fire detection and alarm system, but the system is antiquated. It is recommended that the fire detection and alarm system be upgraded. When completed, the new system will provide visual, as well as audible notification, in accordance with the 2018 IBC Chapter 9, Section 907.2.1 and the State Fire Marshal's requirements.

This project or a portion thereof was previously recommended in the FCA report dated 08/21/2000 and 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

### SIGNAGE FOR ADA COMPLIANCE

The building is lacking ADA signage. Americans with Disabilities Act (ADA) regulations pertaining to parking, building access, route of travel and restrooms has established building signage criteria for permanent spaces in buildings. The criteria includes sign mounting heights and locations; character heights and proportions; raised and Braille characters/pictograms; and sign contrast and finish. This project would provide funding for purchase and installation of ADA signage including directional signage from parking to accessible building entrances, route of travel inside the building and restrooms. IBC - 2018, ICC/ANSI A117.1 - 2003 and Americans with Disabilities Act Accessibility Guidelines (ADAAG) - 2003 were referenced for this project.

This project or a portion thereof was previously recommended in the FCA report dated 08/21/2000 and 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.
PRIORITY CLASS 2 PROJECTS

Two to Four Years

Total Construction Cost for Priority 2 Projects: $63,360

LIGHTING UPGRADE

The existing lighting fixtures are the older fluorescent type, and are not energy efficient. This project will upgrade fixtures to higher efficiency units with a longer life cycle. 5,000K LED lamps, without the ballasts, are suggested, and new tombstones (if needed). Occupancy sensors will be installed in low occupancy areas for additional savings. Electrical wiring upgrades are not included in this estimate.

This project or a portion thereof was previously recommended in the FCA report dated 08/21/2000 and 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

Project Index #: 0881ENR1
Construction Cost $3,660

REMODEL INTERIOR

The interior fixtures and finishes are in general disrepair and the building is due for a complete remodel. This project would provide for removal and replacement of the flooring, doors and frames, cabinetry, trim and baseboards and any other interior finishes and fixtures in need of replacement at the time. This project should be concurrent with all other projects having to do with the interior of the building including the fire safety, lighting upgrade and ADA projects.

This project or a portion thereof was previously recommended in the FCA report dated 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

Project Index #: 0881INT2
Construction Cost $43,000

REPLACE HVAC EQUIPMENT

Several heating and cooling units throughout the building are original and have reached the end of their expected life. This project would provide for replacement of the window mounted evaporative cooler and two electric baseboard heaters and includes removal and disposal of the existing units and all required connections to utilities.

This project or a portion thereof was previously recommended in the FCA report dated 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

Project Index #: 0881HVA1
Construction Cost $15,000

REPLACE WATER HEATER

The average life span of a water heater is eight to ten years. The existing 30 gallon propane water heater in the building has reached the end of its expected life and is not energy efficient. This project would provide for the removal and disposal of the old water heater and installation of a new 30 gallon propane water heater.

This project or a portion thereof was previously recommended in the FCA report dated 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

Project Index #: 0881PLM2
Construction Cost $1,700

PRIORITY CLASS 3 PROJECTS

Four to Ten Years

Total Construction Cost for Priority 3 Projects: $59,400

LONG-TERM NEEDS

4” BACKFLOW, SHUTOFF, VAULT, AND POWER

State Health law now mandates backflow prevention devices be installed on all domestic, fire protection and irrigation systems to prevent contamination. This project makes allowance for installing a 4” reduced pressure backflow prevention assembly, required fittings, an above ground vault, and allowance for 200 feet of 1” conduit to provide power for the required heat source inside the vault.

This project or a portion thereof was previously recommended in the FCA report dated 08/21/2000 and 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

Project Index #: 0881PLM1
Construction Cost $35,000

20-May-21 Page 18 of 21
EXTERIOR FINISHES

The exterior finishes are in fair condition. The non-prefinished painted surfaces are in fair condition. It is important to maintain the finish, weather resistance, and appearance of the building. This project recommends work to protect the exterior building envelope, other than the roof, including painting, staining or other applied finishes, and caulking around windows, flashing, fixtures, and other penetrations to maintain the building in good, weather tight condition. It is recommended that this project be implemented in the next 4 to 5 years and for it to be scheduled on a cyclical basis based on environmental conditions.

FLOORING REPLACEMENT

The VCT (vinyl composite tile) in the building is damaged and reaching the end of their useful life. It is recommended that the flooring be replaced. This project would provide for removal and disposal of the existing flooring and installation of new 12x12 VCT with a 6" base in the next 4 - 5 years.

INTERIOR FINISHES

The interior finishes are in fair condition. It is recommended that the interior walls and ceilings be painted at least once in the next 4 to 5 years and every 5 to 7 years thereafter to maintain the integrity of the interior of the building. Prior to painting, all surfaces should be repaired and prepped. An epoxy-based paint should be utilized in wet areas for durability.

Construction Cost $6,100

Project Index #: 0881INT3
Construction Cost $12,200

Project Index #: 0881INT1
Construction Cost $6,100
The NDF Fire House is a wood framed structure on a concrete foundation. It provides for the storage of tools and equipment for NDF conservation camp activities.

**PRIORITY CLASS 2 PROJECTS**

<table>
<thead>
<tr>
<th>Necessary - Not Yet Critical</th>
<th>Two to Four Years</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Total Construction Cost for Priority 2 Projects:</strong></td>
<td>$4,980</td>
</tr>
</tbody>
</table>

**Lighting Upgrade**

The existing lighting fixtures are the older fluorescent type, and are not energy efficient. This project will upgrade fixtures to higher efficiency units with a longer life cycle. 5,000K LED lamps, without the ballasts, are suggested, and new tombstones (if needed). Occupancy sensors will be installed in low occupancy areas for additional savings. Electrical wiring upgrades are not included in this estimate.

This project or a portion thereof was previously recommended in the FCA report dated 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

<th>0880ENR1</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Construction Cost</strong></td>
<td>$1,980</td>
</tr>
</tbody>
</table>

**Replace Ceiling Mounted Heater**

The building is heated by one ceiling mounted gas heater. It is original to the building and is reaching the end of its useful life. This project provides for disposal of the existing unit and replacement of the unit and associated utility connections. This project or a portion thereof was previously recommended in the FCA report dated 09/20/2007. It has been amended accordingly to reflect conditions observed during the most recent survey date of 05/24/2017.

**Construction Cost**

<th>Four to Ten Years</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Total Construction Cost for Priority 3 Projects:</strong></td>
<td>$9,900</td>
</tr>
</tbody>
</table>

**Exterior Finishes**

The exterior finishes are in fair condition. It is important to maintain the finish, weather resistance, and appearance of the building. This project recommends work to protect the exterior building envelope, other than the roof, including painting, staining or other applied finishes, and caulking around windows, flashing, fixtures, and other penetrations to maintain the building in good, weather tight condition. It is recommended that this project be implemented in the next 4 to 5 years and for it to be scheduled on a cyclical basis based on environmental conditions.

**Construction Cost**

<th>Project Index #:</th>
<th>0880EXT1</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Construction Cost</strong></td>
<td>$6,600</td>
</tr>
</tbody>
</table>

**Interior Finishes**

The interior finishes are in fair condition. It is recommended that the interior walls and ceilings be painted at least once in the next 4 to 5 years and every 5 to 7 years thereafter to maintain the integrity of the interior of the building. Prior to painting, all surfaces should be repaired and prepped. An epoxy-based paint should be utilized in wet areas for durability.
BUILDING INFORMATION:

Gross Area (square feet): 660
Year Constructed: 1987
Exterior Finish 1: 100 % Painted Wood Siding
Exterior Finish 2: %
Number of Levels (Floors): 1
Basement? No

IBC Occupancy Type 1: 100 % S-2
IBC Occupancy Type 2: %
Construction Type: Wood Framing
IBC Construction Type: V-N
Percent Fire Supressed: 0 %

NOTES:
The deficiencies outlined in this report were noted from a visual survey. The costs do not represent the cost of a complete facility renovation or maintenance needs. Recommended projects do not include telecommunications, furniture, window treatment, space change, program issues, relocation, swing space, or costs that could not be identified or determined from the survey and available building information.

Individual projects and costs noted herein may be impacted by new construction materials or methods, agency projects, and pending or proposed Capital Improvement Projects (CIP).

This report was created under the authority found in NRS 341.128 by the State Public Works Division and should be utilized as a planning level document.
